American Defense MFG Mounts and Rifles are 100 percent designed and built in the U.S.A.

American Defense MFG’s Universal Improved Carbine (UIC) is our line of AR-15 and AR-10 patterned rifles that are Intentionally Superior. These rifles are designed from the ground up with ambidextrous controls and overbuilt components such as the ADM HD buffer, ADM enhanced 10 position buffer tube and Criterion match grade barrels. No detail was overlooked to provide you with the most tough and dependable rifle on the market.

We started from the ground up, from custom designs, over-built components to fully ambidextrous controls. Nothing was spared, not one short-cut was taken.
Due to fluctuations in material costs, all prices are subject to change. Please see admmfg.com for current pricing.

Ambidextrous Lower Receiver

The attractive, billet 7000 Series T6 lower receiver is outfitted with an ambidextrous magazine release, bolt catch and release, and selector switch. The magazine well features reinforcing ribs that make the magazine well 40% stronger than mil-spec forged at only ½ an ounce of weight change. The trigger guard is ready for winter gloves without manipulation. Radii and chamfers throughout make this billet lower a marvel that stretches the capabilities of modern production CNC manufacturing. A 20 degree competition style mag well is concealed in the design, allowing lightning fast magazine changes. A right side bolt catch and release lever is standard for every UIC lower, a feature not found on many comparable industry offerings. An integral adjuster allows the end user to compensate for tolerance between your upper receivers and your favorite lower. The selector pictogram is compatible with 45-90 degree selectors.

ADM HD Buffer

The standard carbine buffer is inferior by design with far from optimal reciprocal and non reciprocal mass and an abbreviated platter of weights that operate as one sliding mass without room or plurality necessary to force them to be staggered. The ADM reliability enhancing buffer provides non-reciprocal weight matching the H2 buffer, coupled with a platter of weights that impact in a staggered sequence to eliminate bolt bounce and provide smooth performance without resorting to springs or hydraulic systems which can wear and fail.

Bolt Carrier

ADM’s bolt carrier was critically assessed at the component level. Every component was processed in accordance with the latest TDP including assembly, staking, all heat treats and shot peening to specification. Every component is given a finish pass for optimal surface finish, and grinding is actually done post heat treat. Half a dozen Melonite QPQ processing facilities were evaluated before selecting the finest corrosion resistant lubricous finish available. The BCG is so glassy smooth it requires no break in period. Consulting with a group of armed professionals with over 30 combined years of field use of M16 family rifles, the T&E testers unanimously agreed that the ADM BCG was the finest they had seen. Materials: 9310 (bolt), 8620, (carrier), 4340 (key, cam pin, extractor).

ADM Hybrid Contour Barrel by Criterion Barrels Inc

The key to an accurate rifle, begins with a great barrel. The barrels are 4150 CMV (chrome moly vanadium) steel, 1:8 twist, .223 Wylde chambered with a durable Nitride Finish. Barrels are hand lapped prior to finishing to provide the most consistent bore dimensions possible. The Wylde chamber ensures the barrel is able to shoot to its accuracy potential while safely and optimally handling .223 Remington and 5.56mm NATO ammunition. Barrels are offered in Hybrid contour which promotes ease of handling, as well as typically providing sub MOA accuracy with match grade ammunition and an experienced shooter from a bench rest.
Due to fluctuations in material costs, all prices are subject to change. Please see admnfg.com for current pricing.

UIC
Universal Improved Carbine
MOD 1

Our idea for the Mod 1 UIC was to include as many premium usability, performance, and reliability features as possible at a price point that out competes any other market offerings in its class. We want to give the customer a high level of value while still maintaining the look, feel, and functionality of the Mod 2.

Do not assume the UIC Mod 1 is just another “budget” level AR pattern rifle. The Mod 1 is a workhorse that will serve you reliably day in and day out for years of hard use. ADM isn’t just assembling a rifle; ADM is designing and manufacturing rifles for their customers that are intentionally superior to existing systems.

Specifications

Barrel: 10.5”, 14.5” and 16” Government profile, 4150 CMV, button rifled, 5.56 NATO chamber, 1:8 Twist, nitride finished

Muzzle Device: A2 compensator

Lower receiver: 7000 Series T6 Billet machined, fully ambidextrous, featuring a right side bolt catch and release lever

Upper receiver: 7000 Series T6 Billet machined, milspec ejection port door and forward assist

Bolt carrier group: ADM premium milspec full-auto, HP/MPI tested, Melonite QPQ finish

Trigger: ALG Defense ACT

Safety: Radian Weapons Talon

Charging Handle: Radian Weapons Raptor-LT

Buffer: ADM HD buffer

Color: Type III Teflon impregnated hardcoat anodize.

Accessories:
1- 30 Round PMAG, 1-Gun lock

UIC
Universal Improved Carbine
MOD2

Building on the solid foundation of the Mod 1, the Mod 2 UIC Includes every feature a hard-use customer could want in a premium rifle for performance, reliability, and longevity. Not a single detail was overlooked while designing and testing these top of the line UIC models. The meticulous design and tedious assembly shows in the flawless functionality of these rifles in the hands of an end user.

The Mod 2 is truly a marvel of modern firearms design and manufacturing. It steps up performance and value with features like a Match Grade barrel, Precision 2 stage trigger, and options for barrel length, caliber, and color.

The UIC-10A is a premium featured, large frame AR style rifle chambered in .308 Winchester and 6.5 Creedmoor. These rifles feature the same ergonomic fully ambidextrous controls found on the small frame UIC line. Each of the several configurations feature premium match grade barrels manufactured by Criterion Barrels Inc. These barrels are 416r Stainless Steel, nitride finished, 1:10 twist with .308 chambers reamed to M118 Match specifications. The UIC-10A is suppressor ready featuring the Surefire Warcomp and an adjustable gas block to tune the rifle to your specific ammunition choice. It also features the correct AR-10 length carbine receiver extensions, Sprinco extra power action spring, and an H3 buffer ensuring reliable operation and eliminating any issues common to other large frame AR pattern rifles. The precision 2-stage Fire Control Group allows the shooter maximum control and helps ensure accurate rounds on target, every time.

ADM Aluminum Castle Nut for the AR15/M4 Platform. Machined from aircraft grade aluminum, with a fluted design to provide weight savings.

American Defense MFG UIC Billet Upper Receiver comes with the port door already installed. This specific model does not have forward assist provisions.

American Defense MFG UIC Complete Lower Receiver is built with our patented Fully ambidextrous controls featuring a right side bolt catch and release lever and left side magazine release. Also features the Geissele G2S trigger, Radian Talon safety, ADM enhanced 10 position buffer tube assembly with HD buffer, Magpul MOE grip and SL stock.

American Defense MFG Hybrid Contour Barrel. These barrels are made to our specifications by Criterion Barrels INC and feature a 1:8 Twist, .223 Wylde Chamber coated in a durable black nitride finish. As part of the final process, the barrels are hand lapped and typically provide sub MOA accuracy with match grade ammunition and an experienced shooter from a bench rest.

American Defense MFG Premium Bolt Carrier Group. This is the same Bolt Carrier Group found in our Mod1 and Mod2 Carbines. Featuring a glassy smooth black nitride finish, and built to the latest Milspec TDP.
American Defense MFG Premium Bolt Carrier Group. This is the same Bolt Carrier Group found in our Mod1 and Mod2 Carbines. Featuring a glassy smooth black nitride finish, and built to the latest Milspec TDP.

American Defense MFG Lightweight AR15 M-LOK Rail 13.5” is designed to provide a mounting platform for Magpul M-LOK components and accessories. This handguard features a cut down top rail to allow better grasp on the rail for thumb over bore grip or shooters with smaller hands. Weight savings of 1.3 ounces over our standard MLOK handguard. (Also available in 15” and 17”)

American Defense MFG Hybrid Contour Barrel. These barrels are made to our specifications by Criterion Barrels INC. and feature a 1:8 Twist, .223 Wylde Chamber coated in a durable black nitride finish. As part of the final process, the barrels are hand lapped and typically provide sub MOA accuracy with match grade ammunition and an experienced shooter from a bench rest.
New Products For 2022

The AD-DELTA-C-H-STD mount is made for putting high power glass onto a flattop style AR-15. The AD-DELTA-C-H-STD is a cantilever scope mount with 2” of eye relief built in and high 1.93” height ideal for use with NV or gas masks.

Colors
BLK FDE
AD-DELTA-C-H-STD
Retail $289.00

The AD-RECON-SEW-STD mount is made for putting high power glass onto a flattop style AR-15/AR-10 or bolt action rifle. This is a straight up mount with no forward offset. The rings are spaced farther apart to fit long tube Night Vision and Thermal scopes such as the ATN THOR and similar scopes. The inside ring spacing is 3.86”, outside ring spacing is 5.8”.

Colors
BLK FDE
AD-RECON-SEW-STD
Retail $204.00

The AD-1700-XLR-TL Riser provides a QD solution for an extended length picatinny rail, offering a .60” rise above the mounting surface. The overall length of this mount is 5.5” and offers a forward cantilever to push the optic over the handguard for use with helmet mounted night vision devices.

Colors

The 13.9" CORE Mod 2 Patrol Rifle is designed to be a well-balanced fighting rifle for tactical shooters who utilize weapon lights and laser aiming devices. The CORE Barrel profile was designed to address issues with weight distribution, balance, and handling of traditional profiles, while increasing performance through consistent harmonics and uniform heat dissipation.

The 11.5" UIC Mod 2 Core Defender is Pistol built to be the perfect balance between mobility and utility. The CORE barrel profile is barrel designed with tactical shooters in mind. These barrels are built to address issues with weight distribution, balance, and handling of traditional profiles, while increasing performance through consistent harmonics and uniform heat dissipation.
The Auto Lock™ Lever System

Features: Auto Lock System

The patented† Auto Lock System has been well-received in the industry, so much so that other accessory manufacturers are incorporating the design into their products. The system has the following advantages:

• Does not require proprietary tools for adjustment.

• Can be adjusted with your finger or a flat blade screwdriver.

• Lever can be configured to lock to the front or the rear.

• Superior clamping surface to ensure maximum rail engagement.

† U.S. Patent No. 7,823,316

Materials & Construction

All American Defense MFG mount products feature the following:

• Precision machined from 6061 T6 Aluminum.

• Hard coat anodized for a lifetime of performance.

• Fully adjustable to fit both in spec and out of spec rail systems.

• American Defense MFG, LLC. products feature a lifetime warranty.

• Features The Auto Lock™ Lever system.

• Made with pride 100% in the U.S.A.

Colors

All American Defense MFG parts come in Type III Teflon impregnated hardcoat per military specifications. Certain products are available in Flat Dark Earth (FDE). See the American Defense website adm-mfg.com for details.

The **AD-509T** mount was developed for the Holosun 509T red dot for use on AR pistols and other weapon platforms requiring a small, light weight red dot system.

The **AD-ACRO** mount was developed for the Aimpoint® ACRO red dot for use on AR pistols and other weapon platforms requiring a small, light weight red dot system.

The **AD-RMR-LW** mount was developed for the Trijicon RMR for use on AR pistols and other weapon platforms requiring a small, light weight red dot system.
The **AD-T1-LW** mount is designed for the Aimpoint T1/T2 and similar red dots. This sleek design offers 20% in weight reduction and a less obstructed view of your target for more situational awareness compared to traditional mounts.

The **AD-MRO-LW** mount is designed for the Trijicon Miniature Rifle Optic. This sleek design offers 20% in weight reduction and a less obstructed view of your target for more situational awareness compared to traditional mounts.

The **AD-T1-LW-TL** mount with titanium lever is designed for the Aimpoint T1/T2 and similar red dots. This sleek design offers 20% in weight reduction and a less obstructed view of your target for more situational awareness compared to traditional mounts.

The **AD-509T-TL** mount was developed for the Holosun 509T red dot for use on AR pistols and other weapon platforms requiring a small, light weight red dot system. The mount is a one piece unit that offers low, co-witness and lower 1/3 co-witness optic height.
Due to fluctuations in material costs, all prices are subject to change. Please see admmfg.com for current pricing.

The **AD-22-TL** Burris FastFire Mount was designed as a quick detach solution for the Burris FastFire 1, 2, and 3 mini red dot optics. Also fits the Doctor mini red dot, Hex Wasp/Dragonfly red dots and Vortex Viper/Venom Red Dot sights.

Colors: BLK, FDE

 AIMPOINT M68/COMPM2/PRO MOUNT  
The AD-68 Aimpoint mount provides several solutions for the Aimpoint M68/CompM2/Aimpoint PRO. This mount will also fit similar red dots with 30mm tubes. The 34mm version is compatible with the Browe BSO Optic and the Leupold Freedom RDS. Low, co-witness, lower 1/3 co-witness and lower 1/3rd co-witness cantilever heights are offered in 30mm and 34mm ring sizes.

 AIMPOINT T1/T2 MOUNT-NV HEIGHT  
The AD-T1-NV Mount is a one-piece mount that places the Aimpoint T1/T2 optic at a 2.33” centerline height. This height is ideal for those LE/MIL and self-reliant individuals who utilize night vision devices or protective masks, allowing them to comfortably use all available modes of NV capable optics.

 QD AIMPOINT M68/COMPM2/PRO MOUNT, 2.33” NV HEIGHT-TITANIUM LEVER  
The AD-68-NV-TL Mount is a one-piece QD mount that places the Aimpoint® Micro M68/M2/Pro Optics at a 2.33” centerline height. This height is ideal for those LE/MIL and self-reliant individuals who utilize night vision devices or protective masks, allowing them to comfortably use all available modes of NV capable optics. This mount also fits other red dots that have a 30mm tube.
The **AD-TR** mount was designed to fit the Trijicon RedDot™ and Leupold Delta Point to a Picatinny rail system.

The AD-B2 modular base is the medium base in our modular lineup. It is designed to accept several different risers to accommodate a variety of optics. With no risers installed, it is the ideal base for the mini ACOG.

The AD-B3-HD modular base is a new medium base in our modular lineup. With the added security of two QD Auto Lock throw levers it is a full-size mount for the ACOG and VCOG optics from Trijicon.

The AD-B3-HD-TL modular base is a new medium base in our modular lineup. With the added security of two QD Auto Lock throw levers it is a full-size mount for the ACOG and VCOG optics from Trijicon.

The AD-B3-C Mount is a one-piece ACOG mount that places the optic at a 2.1" centerline height. It allows for a rearward position of the ACOG sight while clearing military issued back up iron sights such as the those supplied by KAC / MATECH.
The AD-B3 modular base is another medium base in our modular lineup. Standalone it is a full-size ACOG mount.

The AD-B5 base is ideal for the 1.5–3x Power Mini ACOG Scopes, such as the TA33 and TA44. The centerline height is 1.8”.

The AD-B3-C Mount is a one-piece ACOG mount that places the optic at a 2.1” centerline height. It allows for a rearward position of the ACOG sight while clearing military issued back up iron sights such as the those supplied by KAC / MATECH.

The American Defense Flip Off magnifier mount is an ambidextrous mount that allows the shooter to quickly transition from a red dot to a magnified red dot by simply flipping the magnifier back and forth from the line of sight. The Titanium locking and adjustable quick disconnect lever offers immediate removal and attachment to adapt to any shooting situation. The mount interface provides three positions to mount the optic that offers additional eye relief options to accommodate various cheek-weld positions on the stock. In addition, the flip off magnifier mount comes with both 4 mm and 8mm spacers that adapt to most red dot standard sight heights to provide low, co-witness, or lower 1/3 co-witness alignment. Compatible with the ADM flik 3/5x, Vortex VMX-3T and Eotech G33 Magnifiers.

American Defense AD-SM Gen2 Mount allows for quick transition from magnified and non-magnified red dot use. The mount accepts any 30mm tubed magnifiers such as the Aimpoint 3X and 6X. The AD-SM mount is available in both absolute co-witness or lower-third co-witness heights.
The American Defense Flip Off magnifier mount is an ambidextrous mount that allows the shooter to quickly transition from a red dot to a magnified red dot by simply flipping the magnifier back and forth from the line of sight. The Titanium locking and adjustable quick disconnect lever offers immediate removal and attachment to adapt to any shooting situation. The mount interface provides three positions to mount the optic that offers additional eye relief options to accommodate various cheek-weld positions on the stock. This stackable weight system is available with both an M-Lok attachment system or American Defense MFG’s patented QD Picatiny rail mount. Weighing in at 1 pound each, Gravity Blocks are machined from nitrided steel billet. M-Lok Gravity Blocks can be easily added or removed in seconds with a single Allen key, while the ADM QD configuration allows for tool-less removal.

Precision Rifle Components Dope Roller is the world’s first quick detach ballistic data turret designed to preset windage and elevation data without requiring shooters to break position from behind the rifle.

SERVICE DISCOUNT

As a token of our appreciation to the brave men and women who serve our country, we offer a special discount program for Law Enforcement and Active Military Personnel.

In order to be considered for our discount program, you need to first register an account on our website. Once you have registered, send us an email with your credentials and your username. Once we verify your credentials, we will move your account into our LE/MIL pricing group. You will be notified by email when your account has been updated. Once you receive your notification you are free to order through the website at your discounted price. You must be logged in to see and purchase at your discounted price.

1. Register an account on our website
2. Email credentials to sales@admmfg.com
3. You will be notified by email once your account has been updated.
4. Order through our website at your new discounted pricing.

Disclaimer: Although we supplement our product line with products from other manufacturers, our discounts apply only to products manufactured by American Defense MFG. Occasionally we may offer discounts on non American Defense MFG products, however, this is on a case by case basis where pricing margins permit.

The retail prices shown in this catalog are subject to change without notice. Check our website: admmfg.com for current pricing.

DEALERS IN YOUR AREA

For a list of authorized American Defense MFG dealers located in your state of residence, go to our website at: admmfg.com and click the “Dealer Locator” to display a list of locations nearest you. If, for whatever reason, you cannot locate a dealer in your area, our customer service department is always ready to personally assist you at: sales@admmfg.com

Beware of foreign-made knockoffs of our product!

Recently, American Defense MFG has become aware of illegal foreign-made substandard copies of our products being sold as originals. Make sure your American Defense MFG products are genuine, order from our approved dealers by visiting our website and locating the dealer nearest you.

EXPORT CONTROL

User acknowledges that any technical data furnished by American Defense Manufacturing LLC in connection with any order may be subject to U.S. export control laws, including but not limited to the Arms Export Control Act, 22 USC 2778, (AECA) and the international Traffic in Arms Regulations, 22 CFR 120–130 (ITAR) promulgated pursuant thereto. In this regard, User agrees, that unless it has obtained prior written consent from the U.S. Department of State, Directorate of Defense Trade Control (DDTC), they will not export, reexport, or transship, directly or indirectly, the goods, documentation, technical assistance, or any media in which any of the foregoing is contained, or other technology provided hereunder or the direct product thereof, to any country or to any non–U.S. citizen.
